PART 1 - GENERAL

1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property¹.

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in the expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

¹ Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct.

Terms and Conditions

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions. The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:-

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report² will be from information contained in the Report and the generic Mortgage Valuation Report.

² Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct

1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format;

- the "Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

PART 2 - DESCRIPTION OF THE REPORT

2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

1. Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
2. Category 2: Repairs or replacement requiring future attention, but estimates are still advised.
3. Category 1: No immediate action or repair is needed.

WARNING:

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value, the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

Description	Two storey detached house.
Accommodation	Ground Floor: Entrance Vestibule, Hallway, Lounge/Dining Room, Conservatory, Kitchen and Cloak Room with w.c. First Floor: Bedroom 1, Bedroom 2, Bedroom 3 and Shower Room with w.c.
Gross internal floor area (m²)	129 or thereby.
Neighbourhood and location	The property is situated within the hamlet of Carrutherstown where limited local facilities are available. The main facilities are available regionally within Dumfries.
Age	We understand that the property was constructed circa 1954.
Weather	Dry.
Chimney stacks	Visually inspected with the aid of binoculars where appropriate. There are two brick pointed chimney stacks.
Roofing including roof space	Sloping roofs were visually inspected with the aid of binoculars where appropriate. Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally. Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property. If this is not possible, then physical access to the roof space

	<p>may be taken by other means if the Surveyor deems it safe and reasonable to do so.</p> <p>The roof is timber framed, pitched and slated with tiled ridging. There are metal valley gutters at the roof intersections. There is a flat roof covering with rubberised sealed finish over the side outshoot.</p> <p>Access to the main roof void was gained from a ceiling hatch in the bedroom. The roof timbers have been overlaid with sarking and, where seen, there is an underslate felt membrane. Insulation has been laid between the ceiling joists.</p>
<p>Rainwater fittings</p>	<p>Visually inspected with the aid of binoculars where appropriate.</p> <p>The gutters and downpipes are formed in cast iron.</p>
<p>Main walls</p>	<p>Visually inspected with the aid of binoculars where appropriate.</p> <p>Foundations and concealed parts were not exposed or inspected.</p> <p>The main walls appear to be constructed of solid brickwork externally roughcast with facing brick features. Internally they are strapped and lined. The side outshoot of the kitchen appears to be of single skin brickwork externally roughcast. The walls have a painted finish.</p>
<p>Windows, external doors and joinery</p>	<p>Internal and external doors were opened and closed where keys were available.</p> <p>Random windows were opened and closed where possible.</p> <p>Doors and windows were not forced open.</p> <p>There is a timber panelled door to the front. There is a PVC double glazed door to the rear. The windows are PVC casements incorporating sealed double glazed units. There is a metal casement single glazed window within the cloak room. There appears to be a timber fascia and asbestos soffit detailing.</p>
<p>External decorations</p>	<p>Visually inspected.</p> <p>Painted external walls, soffits, fascias and rainwater goods.</p>
<p>Conservatories / porches</p>	<p>Visually inspected.</p> <p>Accessed from the dining area is a conservatory with PVC double glazed windows and pitched roof. It has a concrete floor.</p>

Single Survey

Communal areas	Not applicable.
Garages and permanent outbuildings	<p>Visually inspected.</p> <p>Attached to the property is a garage of brick construction under a flat felt roof. There is a concrete floor and concrete roof. There are further potting sheds/garden stores to the side of brick construction with a concrete roof.</p>
Outside areas and boundaries	<p>Visually inspected.</p> <p>Off street parking and access to the garage is over a tarmac driveway. There is a brick roughcast wall to the front. The gardens to the front are mainly laid to grass. There are timber fencing boundaries to the side. To the rear is a concrete, gravelled and grass garden. The boundaries are a mixture of fencing, hedging and brick retaining wall.</p>
Ceilings	<p>Visually inspected from floor level.</p> <p>The ceilings appear to be lined throughout with plasterboard sheets.</p>
Internal walls	<p>Visually inspected from floor level.</p> <p>Using a moisture meter, walls were randomly tested for dampness where considered appropriate.</p> <p>The internal walls are a mixture of plaster on the hard and strapped and lined.</p>
Floors including sub floors	<p>Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.</p> <p>Sub-floor areas were inspected only to the extent visible from a readily accessible and unfixed hatch by way of an inverted "head and shoulders" inspection at the access point.</p> <p>Physical access to the sub floor area may be taken if the Surveyor deems it is safe and reasonable to do so, and subject to a minimum clearance of 1m between the underside of floor joists and the solum as determined from the access hatch.</p> <p>The flooring is of suspended timber construction with the exception of the entrance, which is concrete construction.</p>
Internal joinery and kitchen fittings	<p>Built-in cupboards were looked into but no stored items were moved.</p> <p>Kitchen units were visually inspected excluding appliances.</p> <p>The kitchen units provide a range of wall and base unit storage with worktop surface areas. Any integrated appliances were not checked or tested and are excluded from our inspection. The internal doors are a mixture of timber flush panelled and timber and glazed. There are painted skirtings and facings. A timber</p>

Single Survey

	carpeted staircase leads from the ground to upper floor accommodation.
Chimney breasts and fireplaces	<p>Visually inspected.</p> <p>No testing of the flues or fittings was carried out.</p> <p>There is a brick fireplace within the lounge. Insulation was blocking the flue at the time of the inspection. Other chimneys have been blocked off.</p>
Internal decorations	<p>Visually inspected.</p> <p>The internal decoration is a mixture of paper and painted finishes.</p>
Cellars	<p>Visually inspected where there was a safe and purpose-built access.</p> <p>There are no cellars. A small hatch in the floor of the understairs cupboard provides a visual inspection of the solum. Here the solum appeared to be treated with bitumen. It was not possible to physically inspect this area due to the lack of depth.</p>
Electricity	<p>Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.</p> <p>Mains electricity.</p> <p>The electric meters and consumer unit are located in the kitchen.</p>
Gas	There is no gas supply.
Water, plumbing, bathroom fittings	<p>Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.</p> <p>No tests whatsoever were carried out to the system or appliances.</p> <p>Assumed mains water.</p> <p>The kitchen units are fitted with a stainless steel one and a half bowl sink unit.</p> <p>Sanitary fittings comprise a white wash hand basin and wc within the ground floor cloak room. There is a white wash hand basin, wc and composite panelled and glazed shower enclosure in the shower room.</p>

Single Survey

Heating and hot water	<p>Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.</p> <p>No tests whatsoever were carried out to the system or appliances.</p> <p>Space heating is provided by an oil fired boiler located in the garage. This services radiators in the main apartments. The hot tank was boxed into the bedroom cupboard and was not inspected.</p>
Drainage	<p>Drainage covers etc. were not lifted.</p> <p>Neither drains nor drainage systems were tested.</p> <p>Assumed mains drainage.</p>
Fire, smoke and burglar alarms	<p>Visually inspected.</p> <p>No tests whatsoever were carried out to the system or appliances.</p> <p>There are battery operated smoke detectors within the property. Mains connected smoke detectors with battery back ups and a heat detector should be installed in early course.</p> <p>No comment is made on the existence or otherwise of a burglar alarm.</p>
Any additional limits to inspection	<p>Our inspection of the property was significantly restricted due to the presence of fitted carpets and floor coverings throughout. Insulation materials in the attic also hindered our inspection of this part of the property. No access was gained into the sub-floor areas. Those parts of the property concealed behind fitted units and sanitary fittings etc were not viewed.</p> <p>An inspection for Japanese Knotweed was not carried out. This is a plant which is subject to control regulation, is considered to be invasive and one which can render a property unsuitable for some mortgage lenders. It is therefore assumed that there is no Japanese Knotweed within the boundaries of the property or its neighbouring property. Identification of Japanese Knotweed is best undertaken by a specialist contractor.</p>

Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

Single Survey

2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

 Structural movement	
Repair category	1
Notes	There are no signs of significant structural movement affecting the property on the basis of our limited single inspection.

 Dampness, rot and infestation	
Repair category	2
Notes	There is evidence of woodworm to the floors in the understairs cupboard and to the stair structure. There is a risk that further attacks will be found in floors when floor coverings are removed. Woodworm was also noted within the roof void. Damp meter readings were obtained to a section of wall in the dining room which we were advised was as a result of a defective downpipe. This should be monitored.

 Chimney stacks	
Repair category	2
Notes	There is vegetation growth to the rear chimney stack.

 Roofing including roof space	
Repair category	2
Notes	There is evidence of woodworm to the roof timber. There are a number of chipped slates.

Single Survey

Rainwater fittings

Repair category	1
Notes	No immediate action or repair is needed.

Main walls

Repair category	2
Notes	Areas of isolated bossed roughcast to the main walls. There is open jointing to the brickwork.

Windows, external doors and joinery

Repair category	2
Notes	There are suspect failed double glazed window seals within the lounge and rear vestibule. There is softening to the door facings on the front entrance door. There is possible asbestos containing material to soffit, which should not be disturbed in the course of any maintenance. Please refer to advisory comments within Section 4 of this report.

External decorations

Repair category	1
Notes	The property appears to have been recently painted.

Conservatories/porches

Repair category	1
Notes	No immediate action or repair is needed.

Communal areas

Repair category	-
Notes	Not applicable.

Garages and permanent outbuildings

Repair category	2
Notes	There are signs of water ingress around the front door of the garage. There is woodworm to internal joinery. There is vegetation growth on the flat roof above. Due to the position of the boiler we would consider it only possible to access with a small car. General and ongoing repairs are required to the remaining garden

	stores which are in varying states of disrepair.
--	--

Outside areas and boundaries

Repair category	2
Notes	There is movement and delaminating bricks to the brick retaining wall to the side. There is a large mature tree in the front corner of the garden. This has recently been pruned and will require regular inspection and pruning in the future.

Ceilings

Repair category	1
Notes	Plaster cracking to ceilings.

Internal walls

Repair category	1
Notes	No immediate action or repair is needed.

Floors including sub-floors

Repair category	1
Notes	Our inspection of the floors was restricted due to fixed floor coverings. As previously mentioned, there is woodworm to the flooring evident in the understairs cupboard.

Internal joinery and kitchen fittings

Repair category	2
Notes	The kitchen units are on semi modern lines and have suffered wear and tear commensurate with their age. We are unable to confirm the presence of safety glass within the glazed doors.

Chimney breasts and fireplaces

Repair category	1
Notes	It is generally accepted that all chimney's and flues should be checked and regularly swept by a competent chimney sweep.

Single Survey

Internal decorations

Repair category	1
Notes	The property has been repainted throughout.

Cellars

Repair category	1
Notes	No immediate action or repair is needed.

Electricity

Repair category	2
Notes	The electrical installation is on mixed semi modern lines. The Institute of Electrical Engineers recommends that inspection and testings are undertaken at least every 10 years and on a change of occupancy. It should be appreciated that only the most recently constructed or rewired properties will have installations which fully comply with present IEE Regulations.

Gas

Repair category	-
Notes	Not applicable.

Water, plumbing and bathroom fittings

Repair category	1
Notes	No immediate action or repair is needed.

Heating and hot water

Repair category	2
Notes	<p>The central heating system appears to be on older lines. It is likely that sourcing replacement parts will become increasingly difficult, and this will inevitably affect the prospects of securing a maintenance contract. Future upgrading should be envisaged.</p> <p>It is generally accepted that the heating system should be serviced annually to ensure it functions efficiently and safely and a qualified heating engineer can provide this service.</p> <p>It is assumed that the central heating system has been properly installed, updated and maintained to meet with all current regulations and standards with particular regard to fluing and ventilation requirements.</p>

Single Survey

Drainage

Repair category	1
Notes	No immediate action or repair is needed.

Single Survey

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the previous comments for detailed information.

Structural movement	1
Dampness, rot and infestation	2
Chimney stacks	2
Roofing including roof space	2
Rainwater fittings	1
Main walls	2
Windows, external doors and joinery	2
External decorations	1
Conservatories/porches	1
Communal areas	-
Garages and permanent outbuildings	2
Outside areas and boundaries	2
Ceilings	1
Internal walls	1
Floors including sub-floors	1
Internal joinery and kitchen fittings	2
Chimney breasts and fireplaces	1
Internal decorations	1
Cellars	1
Electricity	2
Gas	-
Water, plumbing and bathroom fittings	1
Heating and hot water	2
Drainage	1

Category 3

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

Category 2

Repairs or replacement requiring future attention, but estimates are still advised.

Category 1

No immediate action or repair is needed.

Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

Single Survey

3. Accessibility information

Guidance notes on accessibility information

Three steps or fewer to a main entrance door of the property:

In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

Unrestricted parking within 25 metres:

For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

1. Which floor(s) is the living accommodation on?	Ground and First
2. Are there three steps or fewer to a main entrance door of the property?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
3. Is there a lift to the main entrance door of the property?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
4. Are all door openings greater than 750mm?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>

8. Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>

4. Valuation and conveyancer issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

- 1) The assumed tenure is Absolute Ownership.
- 2) Details should be confirmed in relation to site boundaries with reference to the title deeds.
- 3) The property has been altered and extended in the past to provide the present accommodation, although we understand that these alterations are historic and in excess of 25 years old. We are advised that the conservatory was replaced approximately 5 years, replacing a like for like structure.

Where defects or repairs have been identified within this report it is recommended that, prior to entering into any legally binding sale or purchase contract, further specialists or contractors advice and estimates should be obtained, to establish the implications, if any, on a potential offer to purchase or the sale price likely to be achieved for the property.

Estimated reinstatement cost for insurance purposes

For Reinstatement Cost Assessment purposes it is recommended that the subjects be insured for a sum of not less than £280,000.

This figure is the estimate of the cost of rebuilding the premises and bears no direct relationship to current market value.

Valuation and market comments

Having considered matters, taking into account the foregoing and our observations on site, we are of the opinion that the current Market Value of the subjects, in their present condition and having the benefit of full vacant possession, may be fairly stated in the capital sum of £180,000 (ONE HUNDRED & EIGHTY THOUSAND POUNDS STERLING).

Mortgage Valuation Report

General Remarks

The property is situated within Carrutherstown where limited local facilities are available. The main regional facilities are available within Dumfries.

At the time of inspection the property was found to be generally well maintained having due regard to its age and character with fittings internally on semi modern lines and decoration to a good standard. Although not an exhaustive list, a number of items were noted including the following:-

1) Evidence of woodworm was found within the floors and understairs cupboard structure as well as the roof timbers. Isolated dampness was noted to a section of walling within the dining area. We understand that this is as a result of a defective downpipe which has now been rectified. This should be monitored. The property should be inspected by a reputable firm of timber/damp specialists and thereafter works required carried out to a fully documented and guaranteed standard.

2) The central heating and electrical installation are on older lines and will require upgrading.

Other rooms comprise a conservatory.

Essential Repairs

None.

Estimated cost of essential repairs £

Retention recommended? Yes No

Amount £

Mortgage Valuation Report

Comment on Mortgageability

The property forms suitable security for mortgage purposes, subject to the specific lending criteria of any mortgage provider.
