

Energy Performance Certificate (EPC)

Dwellings

Scotland

HIGHMORE, OLD CRAIGIELANDS, BEATTOCK, MOFFAT, DG10 9RD

Dwelling type: Semi-detached house
Date of assessment: 04 November 2025
Date of certificate: 04 November 2025

Total floor area: 75 m²

Primary Energy Indicator: 104 kWh/m²/year

Reference number: 1415-5229-3009-0704-1206 **Type of assessment:** RdSAP, existing dwelling

Approved Organisation: ECMK

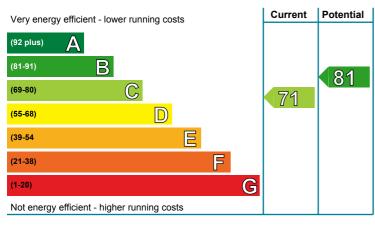

Main heating and fuel: Air source heat pump, radiators, electric

You can use this document to:

- . Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO₂ emissions by improving your home

Estimated energy costs for your home for 3 years*	£5,040	See your recommendations
Over 3 years you could save*	£552	report for more information

* based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

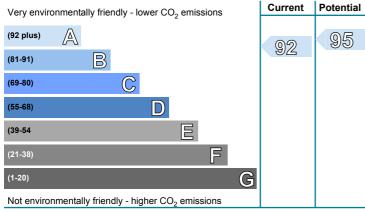

Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band C (71)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Environmental Impact (CO₂) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO_2) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is band A (92)

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Floor insulation (suspended floor)	£5,000 - £10,000	£192.00
2 Heating controls (zone control)	£220 - £250	£201.00
3 Solar water heating	£4,000 - £7,000	£135.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	Sandstone, with internal insulation Cavity wall, filled cavity Solid brick, with internal insulation	**** **** ****	**** **** ****
Roof	Roof room(s), limited insulation (assumed)	***	***
Floor	Suspended, no insulation (assumed) Solid, no insulation (assumed)	_ _	_ _
Windows	Fully double glazed	***	***
Main heating	Air source heat pump, radiators, electric	****	****
Main heating controls	Programmer, room thermostat and TRVs	****	****
Secondary heating	Room heaters, dual fuel (mineral and wood)	_	_
Hot water	From main system	***	****
Lighting	Good lighting efficiency	****	★★★★ ☆

The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO₂ emissions, running costs and the savings possible from making improvements.

The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 10 kg CO₂/m²/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 0.8 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 0.2 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£3,351 over 3 years	£2,961 over 3 years	
Hot water	£1,527 over 3 years	£1,365 over 3 years	You could
Lighting	£162 over 3 years	£162 over 3 years	save £552
Total	£5,040	£4,488	over 3 years

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

Recommended measures		Indicative cost	Typical saving	Rating after improvement	
		Indicative cost	per year	Energy	Environment
1	Floor insulation (suspended floor)	£5,000 - £10,000	£64	C 73	A 93
2	Time and temperature zone control	£220 - £250	£67	C 74	A 93
3	Solar water heating	£4,000 - £7,000	£45	C 75	A 93
4	Add PV battery	£500 - £5,000	£150	B 81	A 95

Choosing the right improvement package

About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

1 Floor insulation (suspended floor)

Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Suspended floors can often be insulated from below but must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about floor insulation is available from many sources including www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation. Building regulations generally apply to this work so it is best to check with your local authority building standards department.

2 Heating controls (time and temperature zone control)

The heating system controls should be improved so that both the temperature and time of heating can be set differently in separate areas of your house; this will reduce the amount of energy used and lower fuel bills. For example, it is possible to have cooler temperatures in the bedrooms than in the living room provided internal doors are kept closed, and to have a longer heating period for the living room. Building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority building standards department and seek advice from a qualified heating engineer.

3 Solar water heating

A solar water heating panel, usually fixed to the roof, uses the sun to pre-heat the hot water supply. This can significantly reduce the demand on the heating system to provide hot water and hence save fuel and money. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check these with your local authority. You could be eligible for Renewable Heat Incentive payments which could appreciably increase the savings beyond those shown on your EPC, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

4 PV Battery

PV Battery

Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

LZC energy sources present:

- Air source heat pump
- Solar photovoltaics

Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit https://energysavingtrust.org.uk/energy-at-home for more information.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	11,559.94	N/A	N/A	N/A
Water heating (kWh per year)	2,776.32			

About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by ECMK (www.ecmk.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Assessor's name: Niall Anderson Assessor membership number: ECMK306689

Company name/trading name: Walker Fraser Steele

Address:

WHINNY RIG DUMFRIES DG1 3RJ

Phone number: 07800705720

Email address: niall.anderson@esurv.co.uk

Related party disclosure: No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit greeners cotland.org or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.

Single Survey

Property Address	Highmore Old Craigielands . Beattock Moffat DG10 9RD	
Customer	Mrs C Morrison & Mr H Morrison	
Date of Inspection	31/10/2025	
Prepared by	Niall Anderson Walker Fraser Steele	

TERMS AND CONDITIONS

PART 1 - GENERAL

1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who will have sufficient current local knowledge of the particular market to competently survey, value and report upon Residential Property. ¹

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by checking the adjacent box.

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

Prior to 1 December 2008, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

 \Box

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential Surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:

- · the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report.²

1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as

Single Survey

detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance
 to the Purchaser towards the purchase of the Property and in whose favour a standard security
 will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format.
- the "Market Value" is the estimated amount for which a property should exchange on the date of
 valuation between a willing buyer and a willing seller in an arm's-length transaction after proper
 marketing wherein the parties had each acted knowledgeably, prudently and without compulsion
- the "Property" is the property which forms the subject of the Report:
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- "prospective Purchaser" is anyone considering buying the Property.
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

¹Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Codes of Conduct

²Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Rules of Conduct.

PART 2 – DESCRIPTION OF THE REPORT

2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- 2.3.1 Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2.3.2 Category 2: Repairs or replacement requiring future attention, but estimates are still advised.
- 2.3.3 Category 1: No immediate action or repair is needed.

WARNING: If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is

made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the reinstatement cost, as defined below.

"Market Value" The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

1. INFORMATION AND SCOPE OF INSPECTION

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the Surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the Surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the Surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities will not be inspected or reported on.

Description	The subjects comprise a one and a half storey semi detached house.
Accommodation	Ground Floor: Kitchen, Dining Room, Living Room, Office (Front Porch area) and Bathroom with w.c. Upper Floor: Bedroom 1 and Bedroom 2.
Gross internal floor area (sqm)	75m2 or thereby, including upper floor accommodation where ceiling height exceeds 1.5 m.
Neighbourhood and location	The property is situated in a scattering of houses on the outskirts of Beattock in an elevated position.
Age	1900
Weather	At the time of the inspection, it was dry.
Chimney stacks	Visually inspected with the aid of binoculars where required.
	There is a stone pointed chimney stack with clay pots and lead flashing detailing.
	As advised by the vendor the chimney flashings have been renewed.

Sloping roofs were visually inspected with the aid of Roofing including roof space binoculars where required. Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defines as being from a 3m ladder within the property. If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so. Roofs are prone to water penetration in extreme storms but it is not always possible for surveyors to identify this likelihood in good or dry weather. All slated roofs in particular should be inspected and repaired by reputable tradesmen on an annual basis and especially after storms. The roof is timber framed, pitched and slated with slated dormer projections. There are shallow sloping slate projections over the front and rear outshoots. Head and shoulders only inspections were undertaken from two ceiling hatches within the upper floor bedrooms. Where seen, the roof timbers have been overlaid with sarking. Insulation has been laid to a minimal level between the ceiling ioists. No roof voids were accessed to the front and rear outshoots. Bed two roof void was not inspected due to the placement of furniture and therefore no comment can be made in relation to this roof space. Visually inspected with the aid of binoculars where Rainwater fittings required. Rainwater fittings are formed in plastic. Main walls Visually inspected with the aid of binoculars where required. Foundations and concealed parts were not exposed or inspected. The main walls are constructed of solid stonework externally pointed and painted. The kitchen outshoot appears to be of cavity brick construction externally rendered. The bathroom infill appears to be of single skin brick construction externally rendered. The front office projection appears to have a single skin brick roughcast base with timber frame and weatherboard upper half. The type of damp-proof course to the main walls cannot be ascertained. There is evidence that cavity wall insulation is installed.

Some walls have been internally insulated.

Windows, external doors and joinery	Internal and external doors were opened and closed where keys were available. Random windows were opened and closed where possible. Doors and windows were not forced open. There is a PVC double glazed entrance door to the rear with PVC double glazed patio doors to the lounge. The windows are PVC casements incorporating sealed double glazed units. There is a timber soffit and fascia detailing. There is a timber door to the office projection.
External decorations	Visually inspected
	Painted external walls and joinery.
Conservatories / porches	None
Communal areas	None
Garages and permanent outbuildings	Visually inspected There is a timber frame and timber clad garden room with PVC double glazed patio doors. There is a shallow sloping profile sheet clad roof. There is a timber framed car port with timber cladding under a sloping corrugated cement sheet roof.
Outside areas and boundaries	Visually inspected
	Access to the subjects is over a shared unmade track. The subjects occupy a terraced site with higher ground to the rear behind the car port and shared drive and lower grass terraces to the front. The boundaries are formed in post and wire fencing, stone retaining wall to the front and hedging. The site is severed via the shared driveway.
Ceilings	Visually inspected from floor level
	The ceilings would appear to be a mixture of lath/plaster and plasterboard.

Internal walls Visually inspected from floor level. Using a moisture meter, walls were randomly tested for dampness where considered appropriate. The internal walls are a mixture of strapped/lined and plaster on the hard surface.

Floors including sub floors

Surface of exposed floors were visually inspected. No carpets or floor covering were lifted.

Sub-floor areas were inspected only to the extent visible from a readily accessible and unfixed hatch by way of an inverted "head and shoulders" inspection at the access point.

Physical access to the sub floor area may be taken if the Surveyor deems it is safe and reasonable to do so, and subject to a minimum clearance of 1m between the underside of floor joists and the solum as determined from the access hatch.

The flooring s a mixture of timber and concrete construction.

The property was furnished and the floors were covered throughout and accordingly our view of the floor timbers/surfaces was restricted.

Internal joinery and kitchen fittings

Built-in cupboards were looked into but no stored items were moved.

Kitchen units were visually inspected excluding appliances.

A timber staircase leads from the ground to upper floor accommodation.

The kitchen units provide a range of wall and base unit storage with worktop surface area.

Any integrated appliances were not checked or tested and are excluded from our inspection.

The internal doors are of timber panel design. There are timber skirtings and facings.

Chimney breasts and fireplaces

Visually inspected. No testing of the flues or fittings was carried out.

There are stoves in the property, in the dining room, lounge and upper floor main bedroom. There is a tiled and timber open fireplace within the smaller bedroom although we were advised that this is not operational.

Internal decorations	Visually inspected
	The internal decoration is to a painted finish.
Cellars	None
Electricity	Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on. Mains electricity. The electric meter and consumer unit are located within the kitchen in a high level cupboard. The consumer unit suggests it was last tested on 13/03/2018.
Gas	None
Water, plumbing and bathroom fittings	Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation. No tests whatsoever were carried out to the system or appliances. Assumed mains water. The kitchen units are fitted with a single bowl sink unit.
	Sanitary fittings comprise a three piece white suite in the bathroom.
Heating and hot water	Accessible parts of the system were visually inspected apart from communal systems, which were not inspected. No tests whatsoever were carried out to the system or appliances.
	Space heating is provided by an operational active air-source heat pump. It is understood to supply both space heating and domestic hot water. Regular servicing in line with manufacturer guidance is recommended to maintain efficiency and performance. There is a hot water tank located in the front projection/office. We assume the stove in the lounge with the back boiler is no longer making hot water.
Drainage	Drainage covers etc were not lifted. Neither drains nor drainage system were tested.
	Drainage is assumed to connect into the public sewer.

Fire, smoke and burglar alarms

Visually inspected.

No tests whatsoever were carried out to the system or appliances.

There are battery smoke detectors. There appears to be smoke detection equipment in place and although not tested, this may not fully comply with Scottish Government guidelines on Fire and Smoke alarms, effective from February 2022. Further checks should be made and the system upgraded as necessary.

No comment is made in relation to the presence or otherwise of a burglar alarm.

There is now a requirement in place for compliant interlinked fire, smoke and heat detectors in residential properties. The new fire smoke and alarm standard came into force in Scotland in February 2022, requiring a smoke alarm to be installed in the room most frequently used for living purposes and in every circulation space on each floor. A heat alarm also requires to be installed in each kitchen. The alarms need to be ceiling mounted and interlinked. Where there is a carbon fuelled appliance such as a boiler, open fire or wood burner etc. a carbon monoxide detector is also required.

The surveyor will only comment on the presence of a smoke detector etc. but will not test them, ascertain if they are in working order, interlinked and / or fully compliant with the fire and smoke alarm standard that was introduced in 2022.

We have for the purposes of the report, assumed the system is fully compliant, if not then the appropriate compliant system will required to be installed prior to sale. This of course should be confirmed by your legal advisor.

Any additional limits to inspection

All references to left and right within this report assume the reader is facing the front of the property from the outside.

During the inspection the property was occupied but fully furnished with fitted floor coverings throughout.

In accordance with Health and Safety guidelines I have not disturbed insulation, furniture or personal effects (particularly in cupboards). Personal effects in cupboards and fitted wardrobes were not moved and restricted my inspection.

Floor coverings have not been lifted therefore I was not able to inspect the sub floor area.

Parts of the property, which are covered, unexposed or inaccessible, cannot be guaranteed to be free from defect.

Random testing for dampness is undertaken internally with the use of a moisture meter where accessible and considered appropriate.

The stop tap could not be located therefore the water supply pipe could not be inspected.

My physical inspection of the roof void area was restricted due to insulation material, stored items and lack of suitable crawl boards. As a result, the roof void area was only viewed 'head and shoulders' from the access hatch.

The loft in bed 2 could not be inspected due to furniture and therefore no comment can be made in relation to that roof space.

The report does not include an asbestos inspection. However, asbestos was widely used in the building industry until around 2000, when it became a banned substance. If the possibility of asbestos-based products has been reported within the limitations of the inspection and you have concerns you should engage a qualified asbestos surveyor.

Concealed areas beneath and around bath/shower trays were not visible. Water spillage in these areas can often be discovered unexpectedly with resultant damage to concealed parts of the fabric.

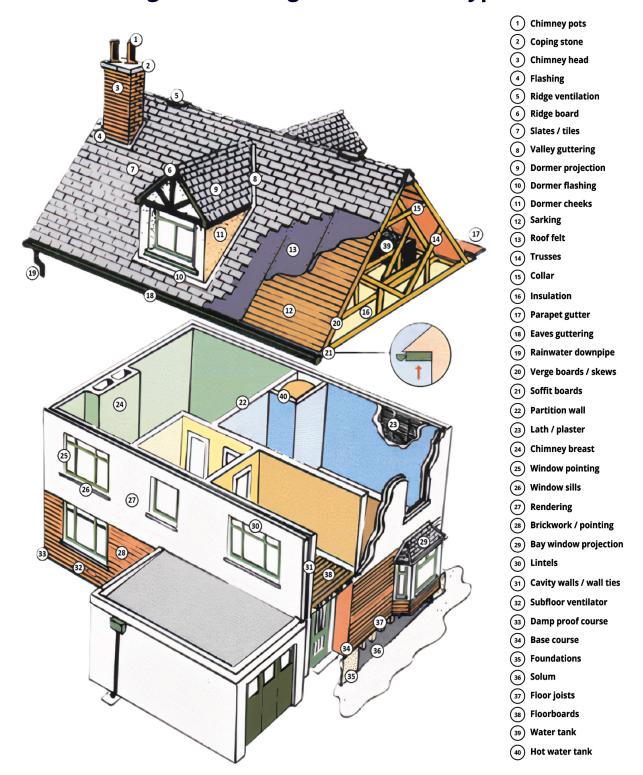

The inspection is not a fire or life safety risk assessment and should not be relied on as a risk assessment inspection. Further advice should be sought if a specific risk assessment of the property and building that it forms part of is required.

An inspection for Japanese Knotweed was not carried out. This is a plant which is subject to control regulation, is considered to be invasive and one which can render a property unsuitable for some mortgage lenders. It is therefore assumed that there is no Japanese Knotweed within the boundaries of the property or its neighbouring property. Identification of Japanese Knotweed is best undertaken by a specialist contractor. If it exists removal must be undertaken in a controlled manner by specialist contractors. This can prove to be expensive.

Single Survey

	Where repairs are required at height compliance with Health and Safety legislation often requires the use of scaffolding which can significantly impact on the cost of repair. Pricing repairs is out with the remit of this report but it would be prudent to consider costs and budgeting before offering. The various trades can advise further.
--	---

Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

2. CONDITION

This section identifies problems and tells you about the urgency of any repairs by using one of the following 3 categories:

Category 1 No immediate action or repair is needed. Repairs or replacement requiring future attention, but estimates are still advised. Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

Structural movement	
Repair category:	1
Notes	There are signs of some historic past movement evidenced by distortions to the internal door frames/fabric. On the basis of our limited single inspection this appears of a long standing nature with no evidence of recent significant movement apparent.

Dampness, rot and infestation	
Repair category:	2
Notes	Damp meter readings were taken where considered appropriate within the property. Moisture levels were found to be within an acceptable range. There is evidence of wood boring insect infestation to the roof timbers and further infestation may be present in concealed areas. A timber specialist should be asked to carry out a comprehensive inspection of the property with a view to completing all necessary repairs using guaranteed methods.

Chimney stacks	
Repair category:	2
Notes	Above average damp meter readings were recorded to wall linings at either side of the chimney breasts at upper floor level. A reputable contractor can advise on all necessary repairs. Chimney stacks appear to be in a fair state of repair within the limitations of our inspection but can be vulnerable to defect and should be regularly maintained.

Roofing including roof space	
Repair category:	2
Notes	The roof coverings are on older lines with no underslate felt membrane. There are a few broken slates. Staining/signs of decay were noted to the sarking timbers abutting the chimney breast.

Rainwater fittings	
Repair category:	2
Notes	There is undulation to the guttering.
	The rear office projection downpipe is not connected to the guttering.
	We would highlight that it was not raining at the time of our inspection and we would recommend that all rainwater fittings be inspected during heavy rainfall in order to ensure they are free from defect.

Main walls	
Repair category:	2
Notes	Some of the walls are of single skin brickwork which is considered to be of inferior construction and will have a higher than average maintenance and poor insulation qualities.

Windows, external doors and joinery	
Repair category:	1
Notes	External timber cladding is weathered/decayed and damaged in places.

External decorations	
Repair category:	2
Notes	Paintwork at external timber components is weathered. There is also weathering to soffits and fascias. Paint finished and decorated external surfaces will require redecoration on a regular basis.

Conservatories / porches	
Repair category:	
Notes	Not Applicable

Communal areas	
Repair category:	
Notes	Not Applicable

Garages and permanent outbuildings	
Repair category:	1
Notes	No obvious or significant defects are affecting the garage.

Outside areas and boundaries	
Repair category:	2
Notes	General and ongoing repairs will be required to the stone retaining wall to the lower side of the garden. Confirm the nature of upkeep and maintenance as well as rights of access over the shared driveway.

Ceilings	
Repair category:	1
Notes	There are no obvious or significant defects affecting ceilings.

Internal walls		
Repair category:	1	
Notes	There are no obvious or significant defects affecting the internal walls.	

Floors including sub floors	
Repair category:	2
Notes	As detailed previously woodworm is evident to timber flooring at first floor level.

Internal joinery and kitchen fittings		
Repair category:		
Notes	There are no obvious or significant defects affecting kitchen fittings. There are no obvious or significant defects affecting internal joinery. Kitchen fittings are serviceable but some wear and tear is noted and some attention is required.	

Chimney breast and fire places		
Repair category:	1	
Notes	It is assumed that the wood burning stove has been installed in accordance with manufacturer's recommendations for fluing and ventilation and has always utilised the correct type of fuel. The appliance has not been tested by ourselves and is therefore presumed in full, safe working order. The flue should be regularly swept.	

Internal decorations	
Repair category:	1
Notes	Internal decoration is generally acceptable although some wear and tear is evident in places.

Cellars	
Repair category:	
Notes	Not Applicable

Electricity	
Repair category:	1
Notes	It is recommended that all electrical installations be checked every five years or on change of ownership to keep up to date with frequent changes in Safety Regulations. Further advice will be available from a qualified NICEIC / SELECT registered Contractor. It should be appreciated that only recently constructed or rewired properties will have installations which fully comply with IEE regulations.

Gas	
Repair category:	
Notes	Not Applicable

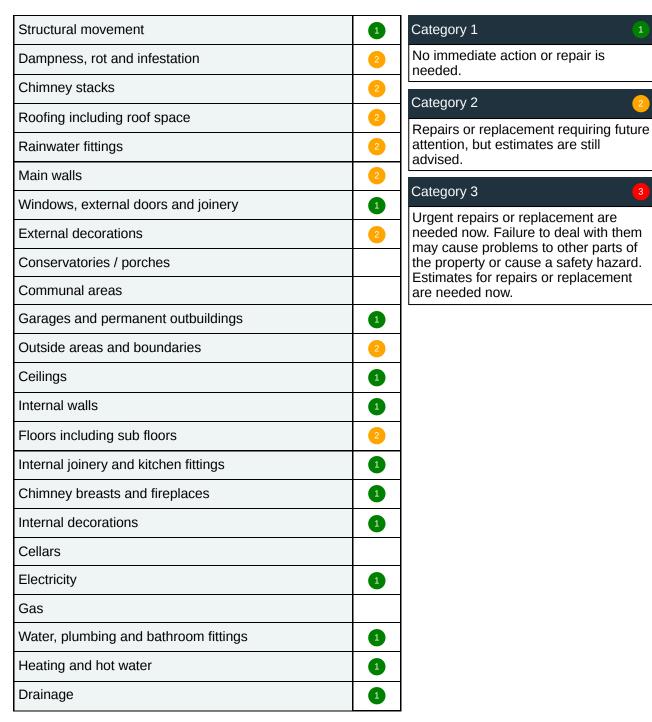

Water, plumbing and bathroom fittings		
Repair category:	1	
Notes	No tests have been undertaken of the system, however within the limitations of our inspection, no significant defects were noted. No inspection has been possible to enclosed timbers beneath wet appliances and no comment has been made on the condition of unseen areas. Watertight seals will require to be regularly checked and replaced, to prevent water damage to adjoining areas.	

Heating and hot water		
Repair category:	1	
Notes	It is assumed that the central heating system has been properly installed, updated and maintained to meet with all current regulations and standards with particular regard to fluing and ventilation requirements. It is assumed that the heating and hot water systems have been properly serviced and maintained on a regular basis and installed in accordance with the relevant regulations.	

Drainage	
Repair category:	1
Notes	There are no obvious defects affecting the foul or surface water drainage systems. Systems not tested. Underground drainage and manholes were not inspected. A limited surface visual inspection found no reportable items of disrepair.

Single Survey

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the comments above for detailed information.

Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

3. ACCESSIBILITY INFORMATION

Guidance Notes on Accessibility Information

Three steps or fewer to a main entrance door of the property

In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

Unrestricted parking within 25 metres

For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

1. Which floor(s) is the living accommodation on?	Ground, First
2. Are there three steps or fewer to a main entrance door of the property?	Yes
3. Is there a lift to the main entrance door of the property?	No
4. Are all door openings greater than 750mm?	No
5. Is there a toilet on the same level as the living room and kitchen?	Yes
6. Is there a toilet on the same level as a bedroom?	No
7. Are all rooms on the same level with no internal steps or stairs?	No
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes

4. VALUATION AND CONVEYANCER ISSUES

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated re-instatement cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

- 1. The assumed tenure is Absolute Ownership.
- 2. The property has been altered and extended to provide the present accommodation and we assume all necessary consents are in order as appropriate. The
- most recent alterations as we are advised is the former front porch which now has consent to be classed as a bedroom.

 3. Full details should be confirmed in relation to site boundaries, details of access and upkeep of the shared driveway.
- 4. Where defects or repairs have been identified within this report it is recommended that, prior to entering into any legally binding sale or purchase contract, further specialist's or contractor's advice and estimates should be obtained, to establish the implications, if any, on a potential offer to purchase or the sale price likely to be achieved for the property.
- 5. The property is fitted with solar photovoltaic panels. All documentation relating to the system should be obtained so that transfer of ownership can be carried out as part of the conveyancing process. It should be confirmed there are no financial liabilities. The feed in tariff details should be confirmed.

Estimated re-instatement cost (£) for insurance purposes

For Reinstatement Cost Assessment purposes, it is recommended that the subjects be insured for a sum of not less than £605,000.00. (Six Hundred and Five Thousand pounds.). This figure is the estimate of the cost of rebuilding the premises and bears no direct relationship to current market value.

Valuation (£) and market comments

Having considered matters, taking account of our general observations on site, we are of the opinion that the Market Value of the subjects in their present condition and with the benefit of vacant possession may be fairly stated in the sum of £185,000 (One Hundred & Eighty Five Thousand Pounds Sterling).

General Remarks									
At the time of inspection the	e property was found	to be in reasona	able cond	ition	having regard to its	age	and character with fitting	as internally on	
modern lines and decoratio	n to an adequate star	ndard. Although	not an e	xhau	stive list, a number o	of ite	ms were noted including	the following:-	
1. There is evidence of woodworm to the roof timbers and flooring at first floor level. The property should be inspected by a reputable firm of timber/damp specialists and thereafter all remedial repairs required carried out to a fully documented and guaranteed standard.									

- 2. The roof coverings appear to be original with no underslate felt membrane. There are a few broken slates. There are signs of damp ingress at the chimney with staining and decay to the sarking timbers abutting the chimney stack.
- 3. Weathered soffit and fascia detailing.

The assumed tenure is Absolute Ownership.

The property has been altered and extended to provide the present accommodation and we assume all necessary consents are in order as appropriate. The most recent alterations as we are advised is the former front porch which now has consent to be classed as a bedroom. Full details should be confirmed in relation to site boundaries, details of access and upkeep of the shared driveway

11.	Responsibilities for Shared or Common Areas	
a.	Are you aware of any responsibility to contribute to the cost of anything used jointly, such as the repair of a shared drive, private road, boundary, or garden area?	Yes / No / Den't Knew
	If you have answered yes, please give details:	
b.	Is there a responsibility to contribute to repair and maintenance of the roof, common stairwell or other common areas?	Yes / Ne / Not applicable
	If you have answered yes, please give details:	
C.	Has there been any major repair or replacement of any part of the roof during the time you have owned the property?	Yes / No
d.	Do you have the right to walk over any of your neighbours' property - for example to put out your rubbish bin or to maintain your boundaries?	Yes / No
	If you have answered yes, please give details:	
e.	As far as you are aware, do any of your neighbours have the right to walk over your property, for example to put out their rubbish bin or to maintain their boundaries?	Yes / Ne
	If you have answered yes, please give details:	
	The Bungalow have right of access over the driveway for both cars and pedestrian access.	
f.	As far as you are aware, is there a public right of way across any part of your property? (public right of way is a way over which the public has a right to pass, whether or not the land is privately-owned.)	Yes / No
	If you have answered yes, please give details:	
12.	Charges associated with your property	
a.	Is there a factor or property manager for your property?	Yes / No
	If you have answered yes, please provide the name and address, and give details of any deposit held and approximate charges:	

b.	Is there a common buildings insurance policy?	Yos / No /
	If you have answered yes, is the cost of the insurance included in your monthly/annual factor's charges?	Yes / No / Den't Knew
C.	Please give details of any other charges you have to pay on a regular basis for the upkeep of common areas or repair works, for example to a residents' association, or maintenance or stair fund.	
13.	Specialist works	
a.	As far as you are aware, has treatment of dry rot, wet rot, damp or any other specialist work ever been carried out to your property?	Yes / No
	If you have answered yes, please say what the repairs were for, whether you carried out the repairs (and when) or if they were done before you bought the property:	
b.	As far as you are aware, has any preventative work for dry rot, wet rot, or damp ever been carried out to your property?	Yos / No
	If you have answered yes, please give details:	
C.	If you have answered yes to 13(a) or (b), do you have any guarantees relating to this work?	Yes / No
	If you have answered yes, these guarantees will be needed by the purchaser and should be given to your solicitor as soon as possible for checking. If you do not have them yourself please write below who has these documents and your solicitor or estate agent will arrange for them to be obtained. You will also need to provide a description of the work carried out. This may be shown in the original estimate.	
	Guarantees are held by:	

14.	Guarantees								
a.	Are there any guarantees or warranties for any of the following:
